Margo,

Thanks for the email. I will speak with Arcadis and the group and get back to you with details on where things stand.

David

Subject: Touching Base on Lower Ley Creek

Hi David,

It has been some time since we last spoke. I hope all is well.

Pam Tames contacted me today following a meeting she had with Arcadis on the Lower Ley Creek subsite. She was informed that the PRP group has a meeting scheduled with Arcadis for tomorrow regarding the ongoing RD. Pam flagged a concern for me that I wanted to pass along to you. She was told that the PRP group has not yet initiated design work with respect to the contaminated sediment at the subsite. EPA understands that this work can and should be started by now. Could you let me know where things stand on this design work? We can certainly plan to touch base after tomorrow's meeting.

Regards,

Margo
